# A MESSAGE FROM THE HEAD OF SCHOOL

“On your marks. Get set. Go!”

When asked to reflect on the 1995-1996 school year, the starter's instructions seemed so appropriate. These simple words can be applied to all who are part of the BCS community and who share in its energizing and energetic existence.

During the all too short summer, the support staff are in a race against time to prepare the campus for our return in early September. Renovations to residences, maintenance of the close to 400 acres of property, and modifications in most school buildings keep them working right up to the moment school opens for the new school year.

Teachers respond to the starter's instructions - hour by hour, day by day, week by week, and month by month. Walking into a class knowing the bell will ring in 50 minutes means that the teacher is in a race to complete the lesson as planned knowing that there will be at least one unexpected interruption. From that very first day of classes, the teacher is constantly aware of pacing - when to test, when to assign major projects, when to put the pressure on and when to ease up. The finish line may appear too soon or not soon enough as teachers try to prepare their classes for the important exams at the end of each term.

Students participate in the race too whether they want to or not. The pressure from teachers to meet deadlines, to prepare properly for tests and exams, and to participate actively in class starts in September and students cannot afford to drop out to take a breather because they will fall further and further behind and never catch up. And when classes are over, the race isn't! Finding the time for crease, activities, committees, friends or simply for oneself is an on-going competition where one sets priorities which change constantly.

In racing, it does no good to start too quickly and burn out, nor does it help to start slow, sprint to the finish and realize you really had a lot left to give. The strategy is to find a steady pace that keeps just enough in reserve to reach the finish line. From my first year at BCS, I suspect that success is met by those who do just that.

# THE PREFECTS

*First Row:* T. Ragueneau, N. Young, F. Gregoire  
*Second Row:* A. Pickard, K. Koll, T. Moreland, C. Pound

In the beginning  
There were nine little prefects  
Eating cookies in a room  
Two went to Dawson and met their doom.  
Seven prefects were there on opening day.  
One ate so many cookies, he died of tooth decay.  
Two prefects were locked in their room  
with tape on the door  
but were soon found by a big Brodoor.  
One prefect had a perfect equilibrium.  
Until they all came and blocked his right atrium.  
Two prefects were always on the crackly phone  
The last prefect was never alone  
because there was the fish.  
This is our story  
of the seven prefects this year  
and,  
as we leave, we shed a tear.

We are the music makers,  
And we are the dreamers of dreams,  
Wandering by lonely sea breakers,  
And sitting by desolate streams;  
World-losers and world-forsakers,  
On whom the pale moon gleams:  
Yet we are the movers and shakers  
Of the world forever, it seems.

CHRISTOPHER JACKSON

The time has come to say goodbye . . . Four score years ago I travelled to the North where I met both resistance and guidance. Where there was resistance, I saw challenge and where there was guidance, I followed the light. Temptation never won the war. Through the spectrum of experiences, I've encountered, good or bad, I've learned. Now it's time to go, not too late and not too soon. Returning only as an outsider, looking through the window of time. Never to be forgotten. Best wishes to all. Chris

CHRISTY POUND

I met my girl on a Mountain side  
Looking for warmth and a place to hide.  
She took me in as the day grew long  
As we lay be the fire our love grew strong.

I left the city for its dirt and grime  
The factory walls to make mountain time  
I found love, but she slipped away  
Now I'm alone, but here I'll stay.

I keep on looking to this very day,  
For my girl who's gone away,  
I'll search this land till the day I die,  
For my sweet loving woman, make a mountain cry.

For me, hearing loss was no laughing matter. But thanks to available hearing help, I can more fully appreciate laughter and other warm sounds that make life fulfilling. One out of every 10 of us has a significant hearing loss. Fortunately, most of us can now benefit medically, surgically or, like me, with hearing aids. Look for warning signs. Are you asking people to repeat themselves? For hearing help information, call toll-free Hearing HelpLine - 1-800-EAR-WELL. Or write to **Better Hearing Institute** at the address below.

JOSE ZAZUETA

The Hitchhiker stood by the side of the road, and leveled his thumb. In the calm calculus of reason. As soon as he stopped trying to fit into a mold, everything was fine. He took breath, waited a beat, and designed a program which everyday moved him closer to his goal. The future is nearly an illusion, that flows out of your imagination. Frozen in time, where boundaries were set only to determine how much further you have surpassed them. It's been real.

BCS models strut their stuff at the spring Fashion Show in May.

# MOUNTAIN SEPTEMBER

# DAY 10, 1995

In late November, the BCS Players' Club presented Denise Deegan's *Daisy Pulls It Off*.

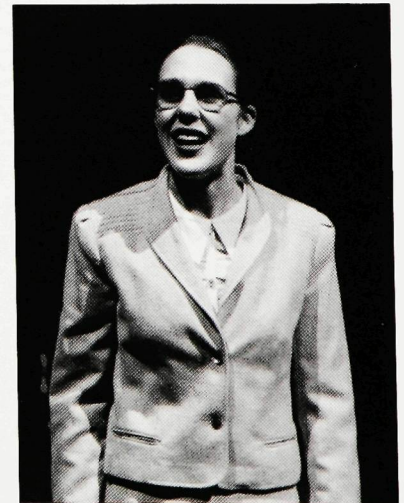

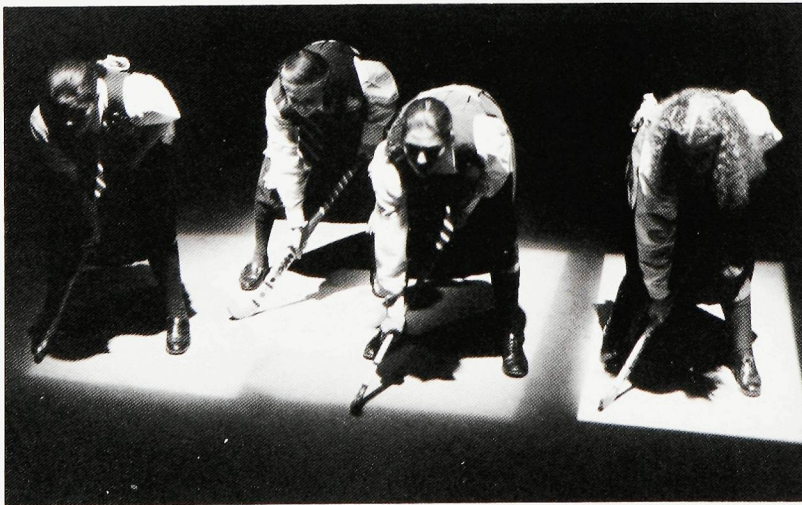

What a choice of play it was! Set at "Grangewood", a public (i.e. private) school in England, this play was full of positive good fun, of jolly hockey sticks and "topping stunts", of "playing up and playing the game", and of always remembering that "the honour of Grangewood was at stake." It told the story of a scholarship student, Daisy, who arrived at the school to a mixed reception from those decent types who welcomed her and those nasty ones who hoped she would fail. Daisy was accused of cheating, of lying, of "sneaking" on others; she was confined to the "san", and was on the brink of expulsion when - for the honour of Grangewood - she was called upon to play in the championship (field) hockey game, where (surprise! surprise!) she scored the tying and winning goals! No sooner than that but she broke the bounds to head up the rescue of her arch enemy from a dangerous cliff. In the end, she discovered the school's hidden treasure, made friends out of enemies and was accepted for the wonderful girl she was. In short, Daisy pulled it off!

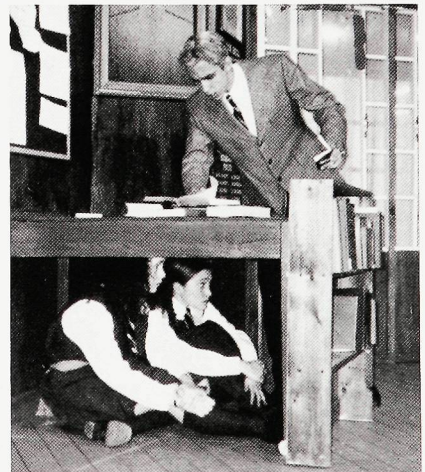

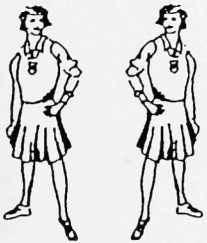

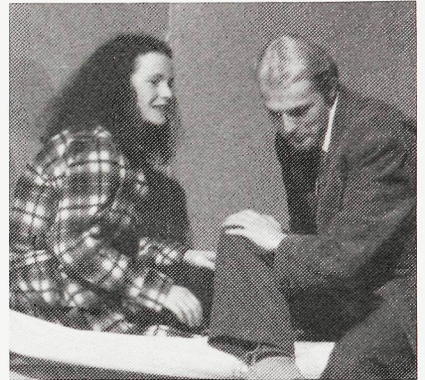

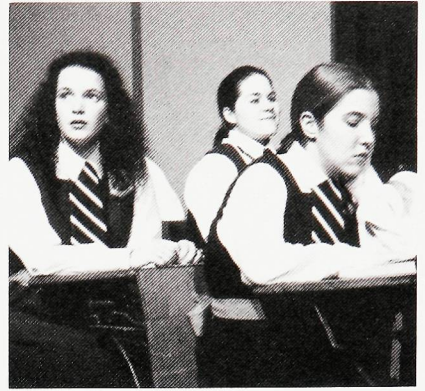

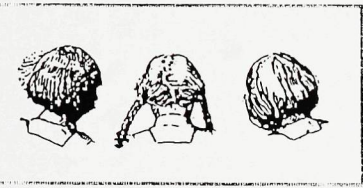

The audience was delighted as Daisy moved from catastrophe to catastrophe, as the plot moved effortlessly from scene to scene - and as anyone in this business will tell you, the more effortless it appears, the more effort there has been!

# WOODSTOCK

"Hey man, I know what the theme is. But ssh! Don't tell anyone."

"Is it rave?"

"Yeah. Cool huh?"

Next Morning, in chapel, an announcement was made.

"If you look at the moon . . ."

No, just joking.

The carnival members came out and made their best announcement yet. (not!) Woodstock '96 was announced (unfortunately, much to everyone's disappointment). So maybe our theme didn't quite smash your violin, but Ms. Layton sure did. Our 100% cotton, Fruit of the Loom t-shirts knocked your socks off. Good thing it didn't knock off your Fruit of the Loom underwear too. What?!?

We had an amazing opening ceremony followed by the great race which was - great. We then had a bonfire and fireworks at night. Ski day was a success due to wonderful weather. We had a pool tournament and sports and the dance the next day. We ended the long weekend with music from the 60's. Overall, it was a fun time for everyone.

Advice for next year's committee:

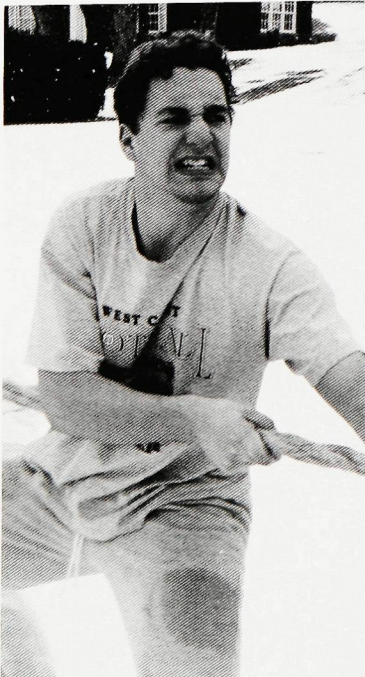

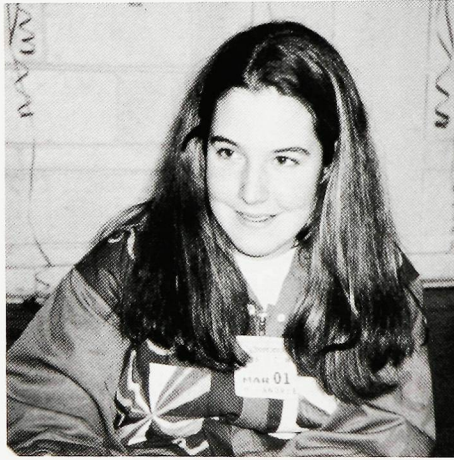

Don't make your fake theme better than the real one.

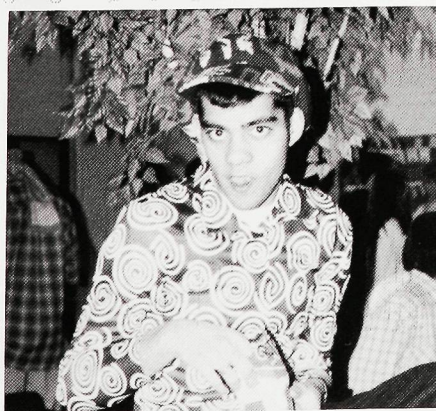

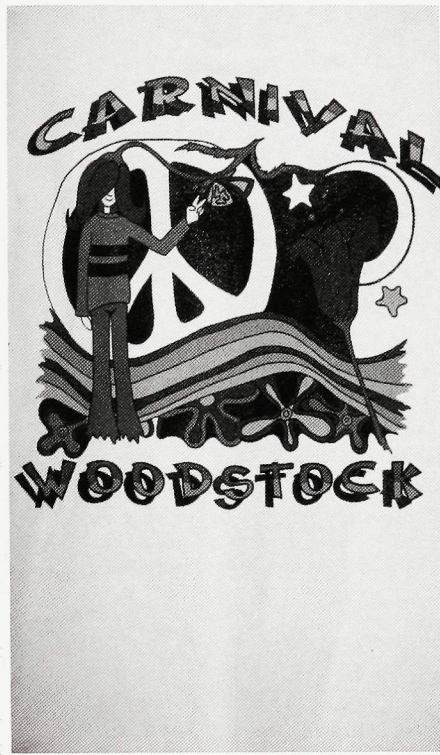

Jean, Thanks for everything.

## The Stoker Arts Festival

The Stoker Arts Festival was held on April 13th and 14th and was filled with both traditional and non-traditional workshops. The school was thus inundated with painters, potters, sculptors, stained-glass artisans, would-be poets and even jugglers - to name but a few.

The festival concluded with an art exhibition, a brief dance performance and a concert.

Perhaps the most ambitious project ever for the BCS Players' Club was taken in the winter of 1996. Maryse Forest and Lewis Evans decided to produce a bilingual version of *Romeo and Juliet* and as if that were not enough, to take it to Montreal for a performance in Moyses Hall at McGill.

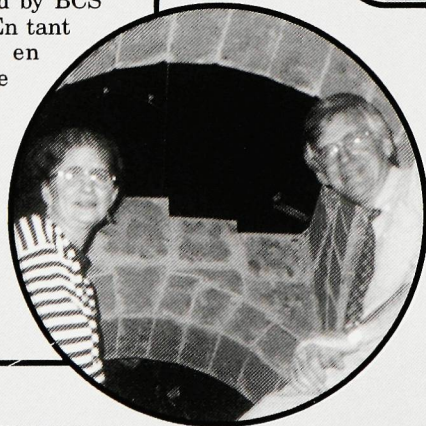

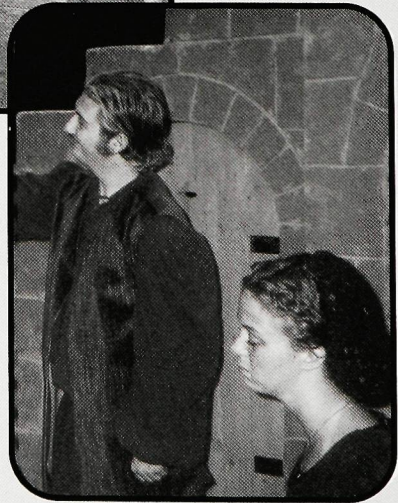

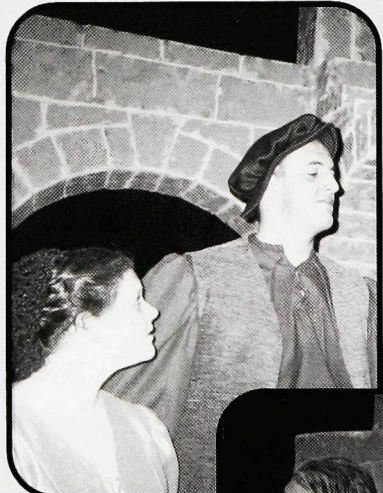

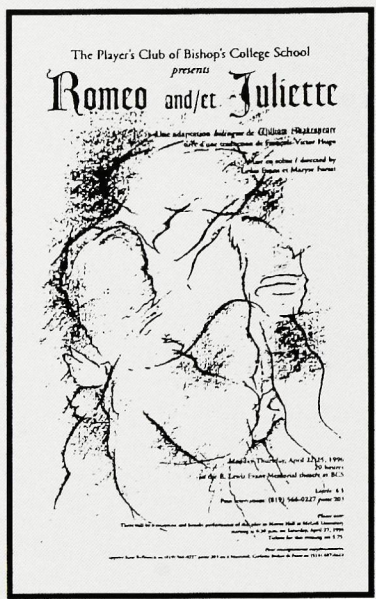

Il n'y avait aucun doute dans leur esprit qu'un tel projet exigeait une production de qualité.

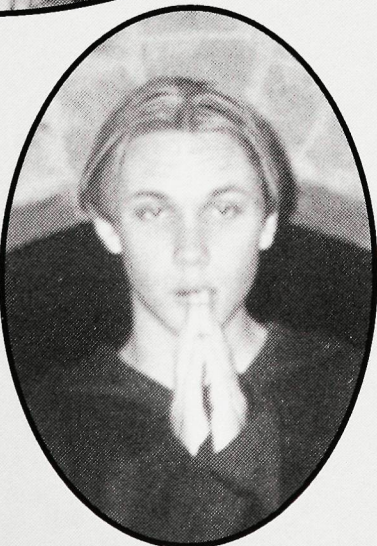

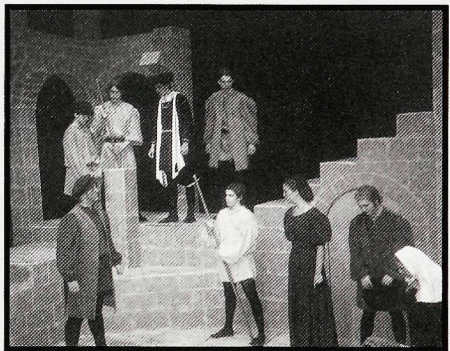

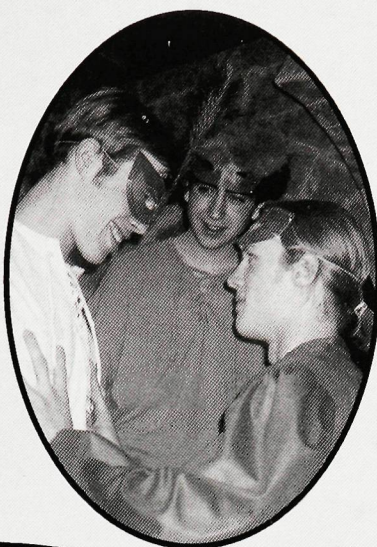

It was.

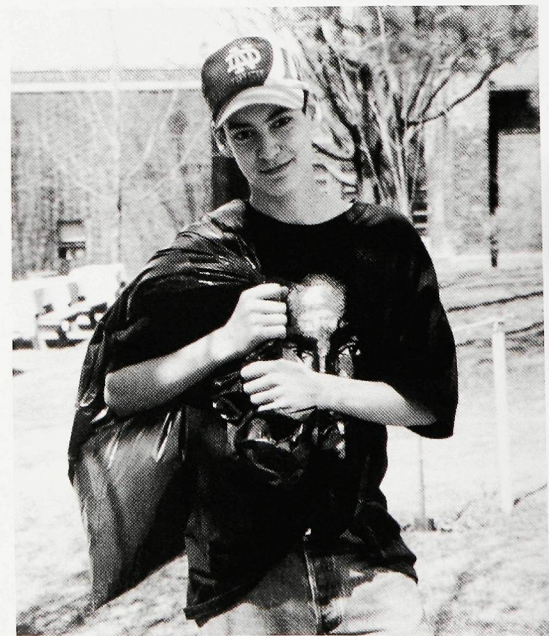

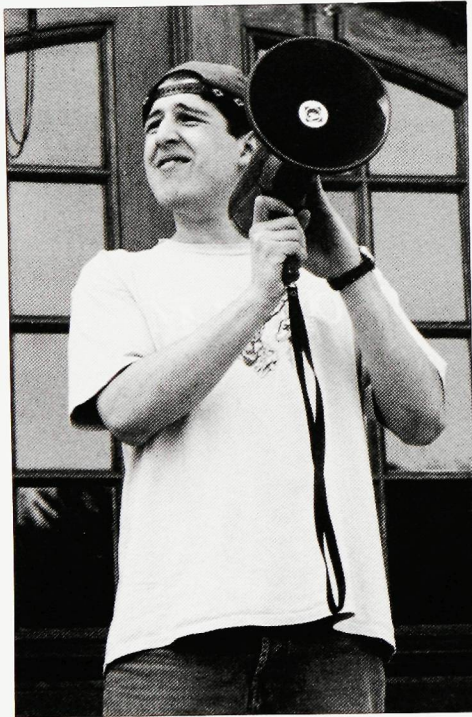

A huge set, designed built to travel, was the foundation on which a consistently solid cast played with a confidence that belied their youth and inexperience. Le bilinguisme des comédiens facilita grandement le passage d'une langue à l'autre; their focus and concentration carried them, not simply into the tragic worlds of those famous star-crossed lovers, but also from one theatre to another; leur respect de l'oeuvre ainsi que de l'originalité de notre approche ne manquèrent pas de susciter chez eux une implication de tous les instants.

The support of the backstage crew was critical and thorough. Le fait de jouer à Montréal fut doublement un défi et ils le relevèrent de façon remarquable.

Many have said that this was the best production to have been staged by BCS in a long time. En tant que metteurs en scène, nous ne pouvons qu'être d'accord et remercions les élèves de nous avoir permis de concrétiser ce magnifique projet.

The earth: a ball of matter flying through space around an average star, the sun. The earth is anything but an average planet, for on or near its surface are swirling collections of matter and energy. In a way, they are like little whirlpools moving around on the surface and bumping into one another, sometimes combining with each other and sometimes splitting off into many separate ones like eddies in a stream. These little whirlpools are you and me and all the animals, the trees, the flowers, including the osprey you saw flying overhead and even the spider you squashed this morning. We are all pieces of the earth brought together for a brief moment of time, powered by the energy of the sun, spinning out our lives on this beautiful planet.

We have been here for only a short period of time. In the past, the earth carried on just fine without humans and it may do so in the future as well. The earth has no particular fondness for humans.

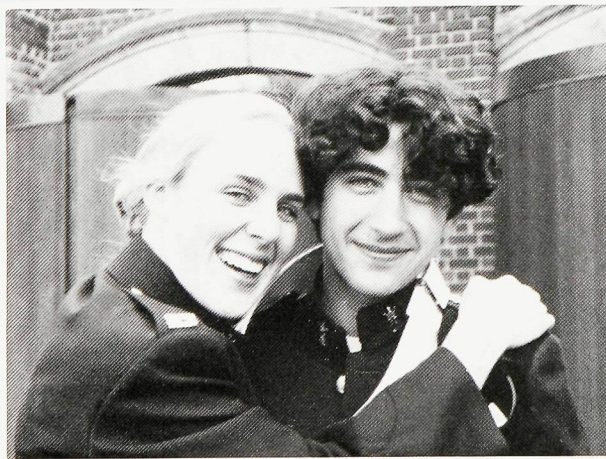

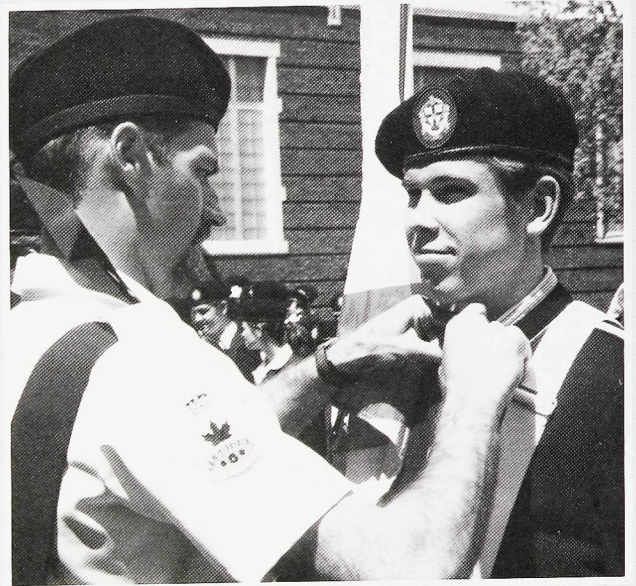

We must, therefore, watch out for ourselves and ensure that the people of the future have a pleasant world to live in and with. One of the ways in which we can do this is to always be aware of the impact of our actions on the health of the planet, to think continually about whether our actions are going to ensure the perpetuation of this human species or are going to hinder this goal. Is eating half the food on your tray a help or a hindrance? Is using a groundhog for target practice a help or a hindrance? Is recycling a help or a hindrance? Only YOU can decide.

We are fortunate to be a part of life and furthermore we are even more fortunate to have become aware of it. Now that we are aware of the world around us and have the ability to change it, we must also become aware of the impact of those changes. We must use this new-found knowledge to help us make judgements about how we should act to help us assess the impact of our actions on the earth now and into the future. We must realize that there is a heaven right here on earth and we are extremely fortunate to have the opportunity to experience it and should do everything that we can to preserve its wonder and beauty for ourselves and future generations.
